

Invest in progress, not promises.

Crowd-investing with a Kickstarter-style progress layer: back startups from €100 and watch them hit their milestones.

HACKATHON PITCH · 2026

THE PROBLEM

Crowd-investors wire money — then hear nothing for a year.

01

Updates are rare, late and buried in PDFs

02

No way to see if the plan is on track

03

Founders lack time to keep backers engaged

THE SOLUTION

Every deal becomes a live progress page.

Shares, bonds and convertibles from €100 — with a roadmap, stretch goals, founder updates and AI-detected signals on every deal.

Q&A

The opportunity

Dutch households installed over 3 million solar panels, but most surplus power is sold back at a loss. Tidewell's battery captures it, then sells at peak prices through its own trading software — cutting a household's energy bill by up to 40%.
